Professional Summary

Programming graduate with a solid foundation in software development, eager to apply academic knowledge and strong problem-solving skills to real-world projects.

Skills

Programming Languages: Java, C#, C++, Python, JavaScript, TypeScript, Swift, SwiftUI, Kotlin, PHP
Web & Mobile Development: HTML, CSS, React, Node.js, Django, ASP.NET, iOS, Android, MAUI, Wordpress
Databases: Oracle, MySQL, MongoDB, Firebase, PL/SQL, MariaDB, HeidiSQL
Networking: DHCP, DNS, Web Server Setup
Tools & IDEs: Git, GitHub, Docker, Visual Studio, VS Code, IntelliJ, Cursor
Productivity Tools: Microsoft Excel, Microsoft Word, Microsoft PowerPoint
Soft Skills: Problem-solving, Multi-Lingual Communication, Time Management, Adaptability, Collaboration

Work Experience

Activists of Tomorrow May 2026 – July 2026
Junior Software Developer Montréal, QC

- Redesigned and standardized UI components app-wide, including buttons, post cards, and navigation, improving visual consistency.
- Built a shared navigation component and new screens, including notifications, messaging, and add-friends pages.
- Developed filtering functionality across screens allowing users to filter content by multiple criteria.
- Implemented input validation across the action call creation flow, improving data integrity.
- Diagnosed and resolved 20+ UI and functionality bugs across map, feed, forum, and profile screens.

Wetzel's Pretzels December 2024 – October 2025
Customer Service Associate / Cashier Montréal, QC

- Processed cash and card transactions via POS, handling \$700+ daily with 100% accuracy.
- Performed safety protocols and hygiene standards, passing 100% of health inspections.

Mojo Ink. March 2023 – August 2023
Project Coordinator Abu Dhabi, UAE

- Assisted project managers in planning, scheduling, and monitoring project activities for timely delivery.
- Coordinated meetings by preparing agendas, recording minutes, and tracking follow-up action items.
- Monitored timelines, deliverables, and milestones, escalating risks or delays to management.

Projects

Music Shop Website ([GitHub Repository](#)) March 2025

- Developed a PHP-based music shop website with product ordering and order management features
- Implemented tax-calculated order totals and dynamic styling based on order values
- Enabled URL parameter support for customizable page display options

CookMania ([GitHub Repository](#)) January 2025 – April 2025

- Built a 3D cooking simulator game in Unity with C# and Firebase
- Integrated authentication, profile management, and adjustable audio settings
- Created tutorial, settings, and profile interfaces with enhanced visual effects

Education

DEC – Computer Science (Programming) August 2023 – May 2026
College LaSalle Montréal, QC

Related Coursework: Computer Tools, Databases I/II, Multi-Tier Applications, Object Oriented Programming, Android Mobile Development, iOS Mobile Development, Information Systems Implementation
